

Geronimo Diese

That's my wrestling name. I define myself as an “activist scientist”. I live in France.

Field of expertise

I am a researcher in a French public institution. My field of expertise is virology and evolutionary biology. I have worked for several years on the evolution of virulence (i.e. understanding why and how parasites damage their hosts). I have been working since 2015 on phage therapy, i.e. using bacteriophages as non-toxic “antibiotics”, chip and simple to produce.

Network

In terms of networks, I actively participate in the following collectives:

- [Alternatives34](#): a network of groups seeking to organize new alternatives to get out of capitalism
- [LABASE](#) : a popular laboratory : “Autonomous Laboratory of Biology: Alternative, Supportive and Experimental”, biological channel of the [BIB-Hackerspace](#), association for technological emancipation

Bibliography

- Article in “The Way of the Jaguar”, January 2018:
